SaaS Valuation Multiples: 2015-2025

Q1 2025 update

Table of Contents

1. SaaS valuations: Listed companies
2. SaaS valuations: M&A transactions

SaaS Valuations: Aventis SaaS Index

SaaS index rebounded in 2024, but is still very far from its peak in 2021

SaaS Index, 01.01.2015=100

Note: equal-weight index; 01.01.2015=100; IPO date=100 for companies that went public after 01.01.2015

Comment

- Index of SaaS companies has been slowly growing in the 2015-2020 period driven by the expanding valuation multiples, as well as by rapid growth of the companies.
- After the unprecedented monetary and fiscal stimulus and COVID digitalization tailwinds, the index jumped in 2020 to over 600 points by early 2021.
- After the investor sentiment changed, interest rates grew and profitability came back to focus, investors rushed to sell SaaS companies, especially the ones with no profits.

Q2 2025 update

- As of June 2025, the Aventis SaaS Index is down by 12% YTD
- The index value was 462pts at the end of June 2025

SaaS Valuations: EV/Revenue multiple

EV/Revenue valuation multiples for listed SaaS businesses have started recovering after being stagnant at ~6.0x in the past few months

Median EV/Revenue multiple, 2015-2025

Comment

- Revenue multiples have been growing slowly between 2015-2019, reaching a median of 13.6x before the COVID drop.
- Market drop in March 2020 was short lived, with the multiples quickly recovering.
- Many SaaS companies went public during the peak of the valuations, with the 25% highest valued companies trading at above 30x Revenue.
- The highest multiple recorded in our sample was Asana, closing at 89.0x LTM Revenue in November 2021.

Q2 2025 update

- In mid July 2025, the median revenue multiple was 6.0x

Deep-dive: SaaS growth rates

SaaS revenue growth rates continued to deteriorate reaching a median of 13% in Q1 2025

Comment

- SaaS growth rates have been slowly decelerating over the past nine years, as many companies reached scale.
- By Q2 2020, the median growth rate of SaaS business declined to 23% YoY.
- Pandemic provided a temporarily relief, pulling forward the demand for software and accelerating the growth by 11pp.
- After peaking in Q2 2021, the growth rates are slowly returning to the long-term trendline and may even overshoot to the downside in case of a major recession.

Q1 2025 update

- A continued decline of SaaS growth rate in Q1 2025, driven by lower new adds and a shift of growth in the AI space

Deep-dive: SaaS profitability

After large layoffs signaling cost control and focus on efficiency, profitability margins of SaaS companies have moved towards positive territory

4 quarters rolling average margin, %

Comment

- Over the 2015-2022 period, a median SaaS company lost money on both Net Income and EBITDA margin basis.
- Following the margin increase in 2016-2019, SaaS margins deteriorated again as the companies invested in growth aggressively.
- While many companies report positive FCF margins, it commonly includes the add-back of stock-based compensation.
- Focusing on efficiency in 2022-2023 has brought some improvement in margins, yet the median margins are still below zero as of Q1 2023

Q1 2025 update

- Profitability margins of SaaS companies have continued to moved towards positive territory, but the improvement trajectory is slowing down

Deep-dive: SaaS Rule of 40

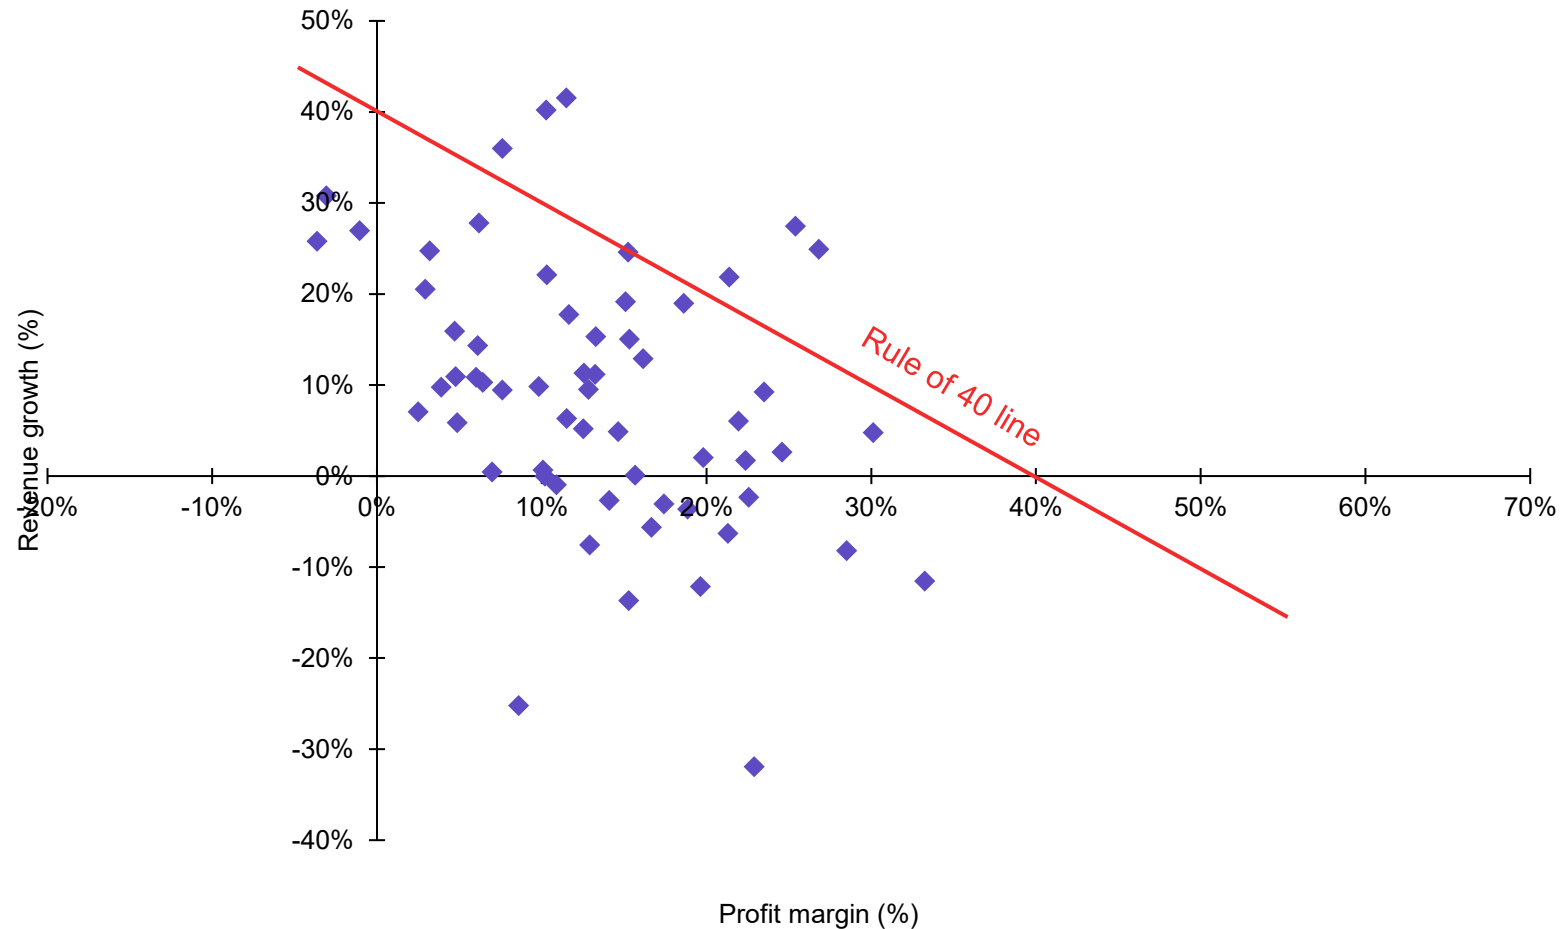

Rule of 40 metric for SaaS companies have been slowly declining over the past nine years

Deep-dive: Rule of 40

Very few companies are satisfying Rule of 40 in our analysis from 2015-2025

Profit margin vs. Revenue growth, % As of Q4 2024

Comments

- Among 73 companies in our sample, only a couple stayed above Rule of 40 as of Q4 2023.
- As of Q4 2023, the companies comfortably above Rule of 40 included Adobe, Paycom, and Descartes Systems.
- Rule of 40 implies a one-to-one tradeoff between a percentage point of revenue growth and margin.

Q1 2025 update

- Most companies still fail to meet the Rule of 40 score. Out of 62 actively traded SaaS companies in our index, 56 companies had a Rule of 40 score below 40.

Deep-dive: Rule of 40

A 10-point improvement in Rule of 40 metric is generally corresponding to a ~1x revenue multiple growth

Revenue multiple vs Rule of 40

Comments

- Rule of 40 remains a good predictor of a company's valuation multiples.
- Using the latest available data from 18 March 2024, a 10% increase in Rule of 40 metric added 1.4x to the Revenue multiple.
- A company with a zero Rule of 40 metric is expected to trade at around 3.0x Revenue.
- It is true that a higher Rule of 40 score generally corresponds to a higher valuation multiple, but this can be influenced by company specific factors that also need to be considered.

Q1 2025 update

- A 10% increase in Rule of 40 score adds 0.8x to the Revenue multiple as of Q1 2025.

Table of Contents

1. SaaS valuations: Listed companies
2. SaaS valuations: M&A transactions

SaaS Multiples

Since 2015, SaaS companies have had median EV/Revenue of 4.7x and EV/EBITDA of 22.1x

Multiple (2015-2024)	Sample (n)	Median deal size	1st quartile	Median	3rd quartile
EV/Revenue	460	\$58M	2.5x	4.7x	8.3x
EV/EBITDA	186	\$101M	12.7x	22.1x	43.1x

N=459 transactions

SaaS valuation multiples in M&A transactions

The EV/Revenue multiple for SaaS companies has been declining over the past years

Valuation drivers: Deal size

Deals above \$50M have significantly higher valuations than smaller deals

Median EV/Revenue multiple by deal size, 2015-2024

Key findings

- The EV/Revenue multiple for acquired SaaS companies tends to increase with the size of the company.
- The gap between the 1st and 3rd quartile of the EV/Revenue multiple widens as the size of the company increases.
- Larger deals include strategic acquirers, take-private transactions, yet the elevated competition for such deals is also a major factor.
- The sample size for the "\$0-5M" size category is smaller and the companies in this group may have elevated multiples due to lower absolute revenue size.

Valuation drivers: SaaS vs Non-SaaS business model

The EV/Revenue multiple for SaaS companies is generally higher than for Non-SaaS, but the premium has decreased in the recent years

SaaS vs Non-SaaS software, EV/Revenue multiple

Key findings

- In the sample analyzed, SaaS companies had consistently higher EV/Revenue ratios than other types of software companies.
- The “SaaS premium” stayed elevated in the 2015-2020 period but has since declined.
- We believe the increased competitiveness of investors for any software deals, as well as ongoing transition to the cloud contributed to its decline.

Valuation drivers: Target location

US SaaS companies made up most acquisitions in the sample and had the highest valuations and deal sizes

Country of Target Company	Number of deals	Median size, m USD	Median EV/Revenue	Median EV/EBITDA
 USA	185	300	5.5x	32.1x
 United Kingdom	59	23	4.2x	18.0x
 Norway	25	27	5.2x	22.7x
 Australia	26	58	3.2x	16.8x
 Canada	15	63	4.8x	32.8x
 France	18	45	2.7x	10.8x
Other	131	17	3.1x	16.1x
Total	459	41	4.8x	22.4x
