# AI Valuation Multiples

Funding rounds, valuations, and investor universe: 2010 - H1 2025

### Methodology

We approached the Al Valuations analysis using a straightforward and simple methodology that is easy to understand for all our readers

**Data Source** 

We used **Crunchbase** (for private companies) and **Capital IQ** (for public companies)

Geography

We exported the Global AI companies' capital raising data from Crunchbase for our analysis

Definition of an Al company

Our export was based on the industry tag - **Artificial Intelligence**, containing 6 different subsegments such as Generative AI, Machine Learning, Predictive Analytics, NLP, RPA, and Intelligent systems

**Total results** 

Our team analyzed a total of ~57,000 Al funding rounds

### Table of Contents

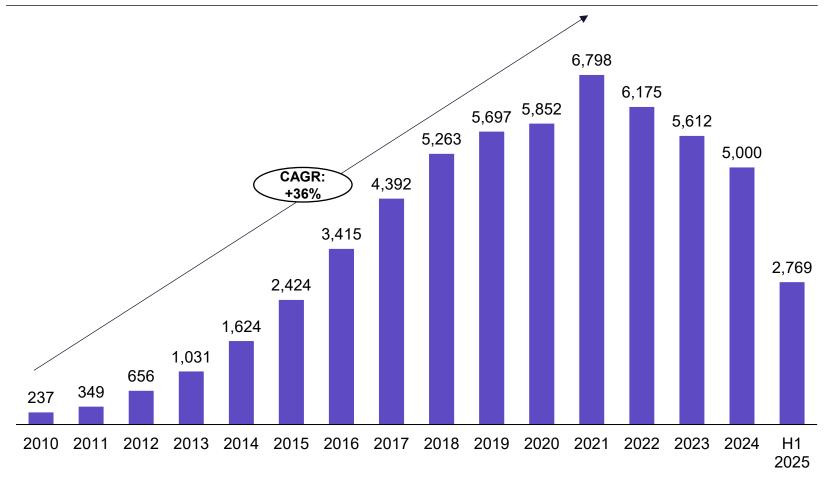

- 1. AI valuations: Capital Raising
- 2. AI valuations: Listed companies

### AI Funding: Number of funding rounds

The number of fundraising rounds in the AI space has consistently grown during 2010-2021, but had since started to decline

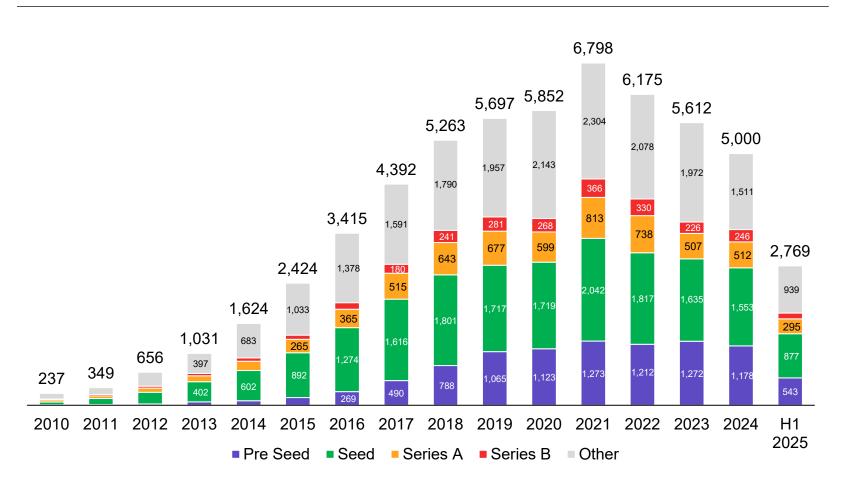

- The number of funding rounds in the AI space grew consistently during 2010-2021
- 2021 was the peak year for fundraising for AI companies – no. of rounds reached more than 6,700, a 16% increase compared to 2020
- 2022 was the year of a slight pause as investors faced new interest rate regime realities and the funding dried out
- 2024 showed continuity with dropping funding rounds. However, this did not translate into lower overall capital investment. On the contrary, 2024 was a new record-breaking year in terms of total capital invested in AI.
- As of June 2025, there have been 2,769 funding rounds, which imply roughly 5,500 rounds by the end of year – a first increase since 2021.

# AI Funding: Number of funding rounds by stage

Pre Seed, Seed, and Series A rounds dominate the capital raising landscape, similarly to other technology segments

Number of funding rounds, #

#### Comment

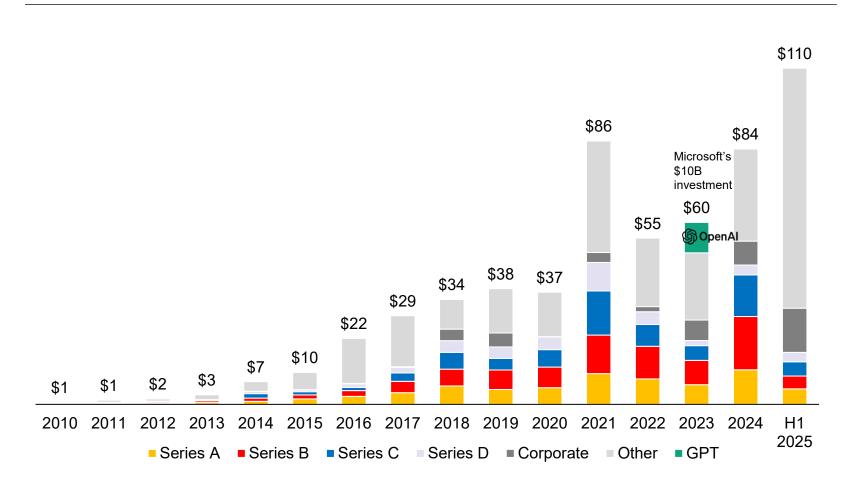

- In the last decade, 48% of total fundraising rounds in the AI space were Pre-Seed and Seed rounds
- Naturally, there is an active market for smaller funding rounds, and only a fraction of startups become successful to raise multiple rounds
- Number of funding rounds has been growing across stages over the past 15 years
- The deterioration of funding environment affected the later stages the most with number of rounds declining in 2021-2025

Aventis Advisors Source: Crunchbase 5

### AI Funding: Value of capital raised

Corporate investors continued to be one of the biggest and most aggressive investors in AI companies in 2025

Total value of capital raised by AI companies, \$B

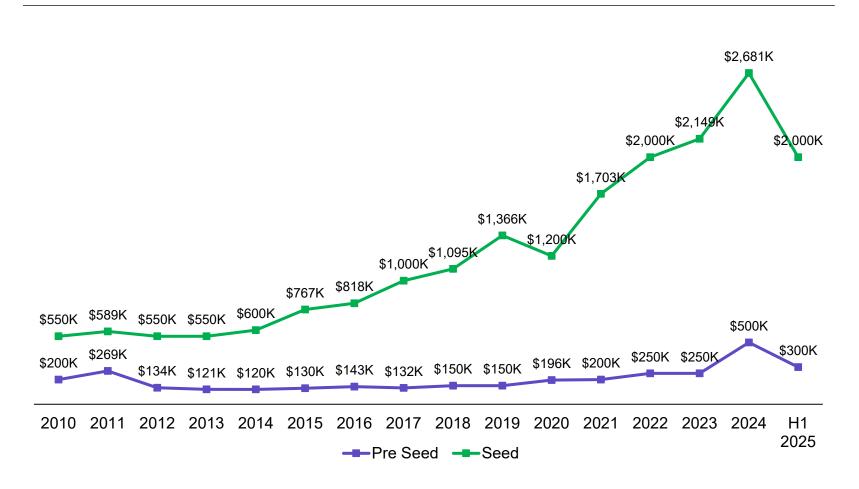

- About 50% of capital invested in Al companies came during Series A to D and Corporate rounds
- Corporations invested \$16 billion into Al companies in 2023 – the largest volume of investments in history
- Microsoft's \$10 billion investment in ChatGPT's parent company OpenAl was the most prominent deal of 2023
- Total money invested in AI continues to rise throughout 2025, breaking all time new highs; but almost half of such value originates form the two largest deals of the year: OpenAI's latest \$40 billion venture round, and Meta's \$14.3 billion investment in Scale AI

### *AI Valuations:* Median round size by stage (1/2)

Median round size has more than quadrupled for Seed rounds starting from roughly half a million in 2010 to \$2 million in H1 2025

Median round size, \$K

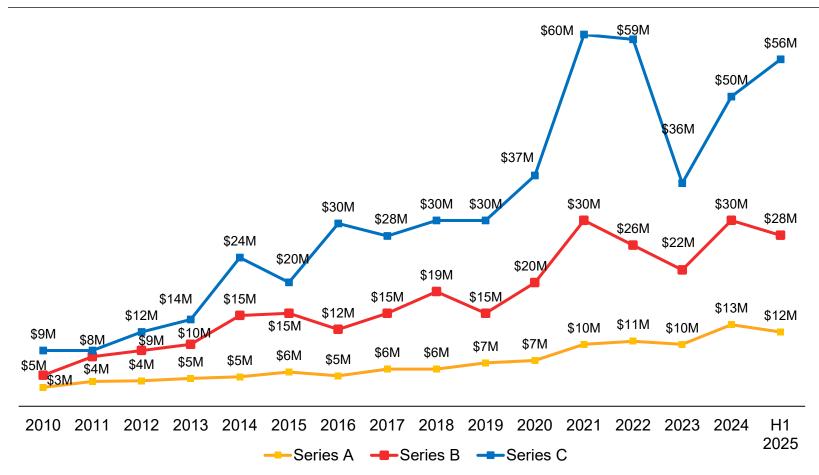

- The median Pre-Seed round size for Al companies stayed stable over the past 10 years at around \$100-120K
- The median Seed round size for Al companies has been growing and reached around \$1.7M-3.0M in 2021-2025

### *AI Valuations*: Median round size by stage (2/2)

Later stages median round sizes have been growing consistently with a significant jump in 2021-2022

#### Median round size, \$M

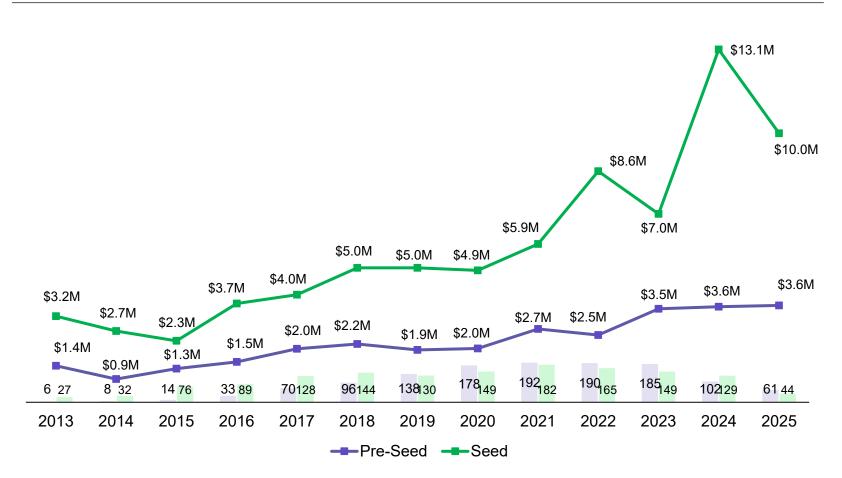

- Median round sizes have been growing across all stages
- Round sizes jumped during 2021-2022 tech boom, following massive monetary stimulus and an abundance of capital during COVID
- The largest jump in median round sizes was observed in Series B and C, dominated by large VC investors, such as, Andreessen Horowitz, HV Capital, EQT Ventures, and Sequoia.
- Following the interest rate increases and normalization of appetite for tech investments, the values have returned to their pre-COVID trendlines

### *AI Valuations:* Median pre-money valuation (1/2)

The median valuations of AI startups have grown significantly over the past 10 years

Seed and Pre-Seed rounds - Median pre-money valuation, \$M and Sample size, #

Note: as valuations are not disclosed for most of the rounds, the sample is different from the analysis of median round sizes

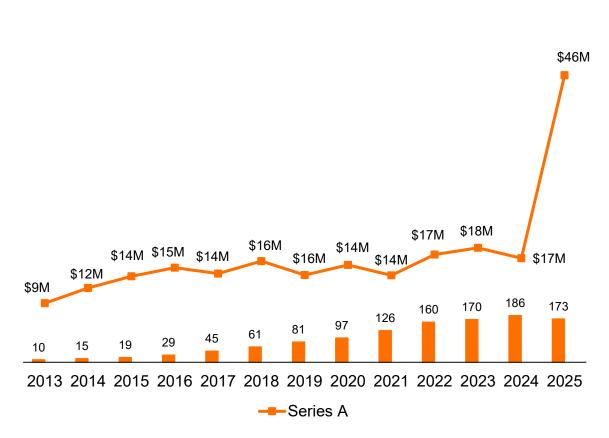

- Pre-money valuation is the total equity value of a company before receiving cash from a round
- The pre-money money valuation is increased by the additional equity (cash) contributed by the investors, resulting in post-money valuation
- The median pre-money valuation of a Pre-Seed AI start-up is at an all-time high of \$3.6 million
- The median pre-money valuation of a Seed stage AI company has reached \$10 million in 2025

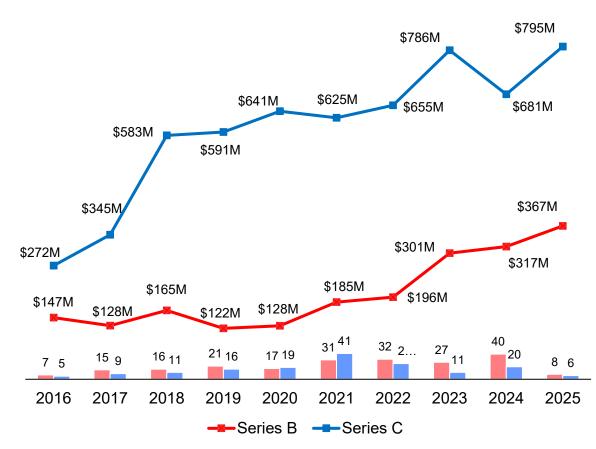

### *AI Valuations:* Median pre-money valuation (2/2)

The median valuations of AI startups have grown significantly over the past 10 years

Series A: 3-year rolling average pre-money valuation, \$M

Series B and Series C: 3-year rolling average pre-money valuation, \$M

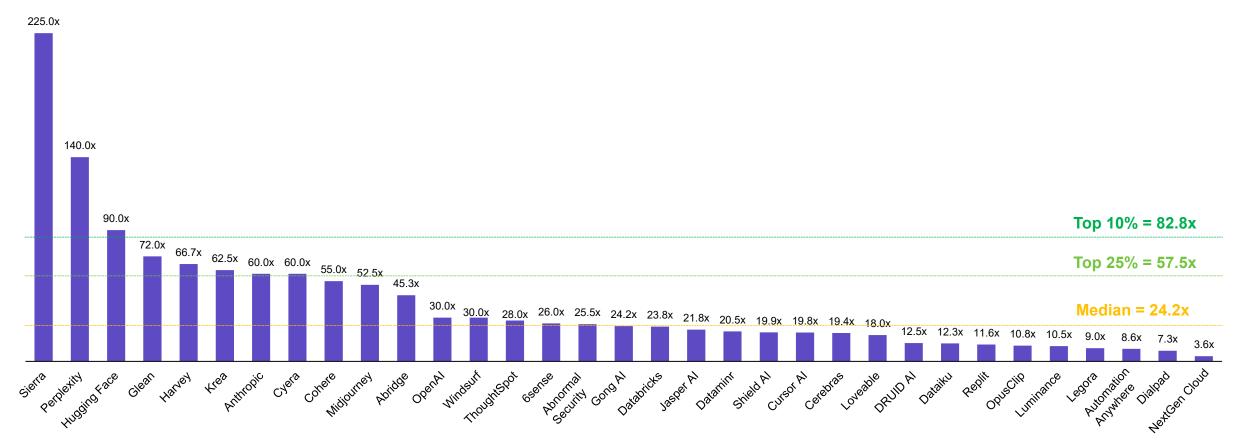

Note: as valuations are not disclosed for most of the rounds, the sample is different from the analysis of median round sizes

# AI Valuations: EV/Revenue multiples in funding rounds

There is a big discrepancy seen between valuation multiples of private AI companies starting from 3.6x revenue to 225.0x revenue

#### EV/Revenue multiple of selected AI companies, as of Jul 2025

Note: The information presented here is based solely on data available from public media reports or market estimates. This ensures transparency but may not capture latest financial details if they haven't been disclosed.

# *AI Valuations:* Private Companies EV/Revenue Multiple (1/2)

Valuation benchmarks for AI companies are available primarily for the largest funding rounds of leading companies
